

Mync

Media Player, Organizer and Uploader, with a Simple-to-Use Editor

Media content management system for video, audio and still images that's easy to use, so how you handle media is more intuitive and powerful.

The video production world struggles with many different file types and formats of digital media. Mync (pronounced mink) from Grass Valley, a Belden Brand, not only functions as a universal media player, but also automatically organizes your content to make it easy to manage and share.

Mync comes in two stand-alone versions: Basic and Standard:

Mync Basic — A downloadable application designed to provide exceptional format support for media playback and content organization — a media player on steroids. If you use a smartphone or DSLR camera and simply looking to manage and play back your digital media and upload a simple playlist to online content platforms, including YouTube and Vimeo, then Mync Basic is for you. Note that supported video formats and storyboard functionality will be limited — see Mync Standard. The Mync Standard trial version is available on www.myncworld.com. For details, visit the Grass Valley Mync webpage or www.myncworld.com.

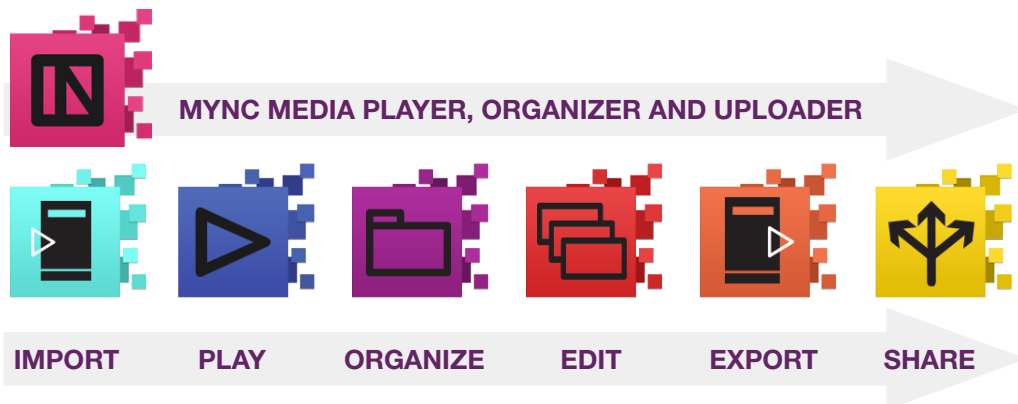

Mync Standard — Adds more functionality to the Basic version with storyboard video editing and more advanced content management features. This version is designed for digital photographers, web content creators and people new to video editing, with a simpler user interface (compared with Grass Valley EDIUS or similar NLEs). Note that the Mync Standard version is included free with EDIUS 9.

Content Management

Mync includes a universal media player, leveraging the Edit Anything format support of EDIUS. The media player is tuned for optimized playback, even on modest-specification PCs, and is kept up-to-date with the newest camera formats.

Mync provides more than just video format support — it also lets you import and organize audio and still image formats, with a powerful search function. You can also organize your media according to your criteria using Mync's Smart Catalog function.

Best of all, Mync is easy to use with storyboard editing, a simple export function and support for touchscreens and high-resolution displays. And when you're ready to share your video with friends, family, colleagues, clients or the rest of the world, uploading to YouTube and Vimeo is built right in.

* For video RAW files, only thumbnail view is supported. Preview is not supported.

This screenshot shows the metadata editor for a video file. It features several panels:

- Type:** Video, Still, Audio
- Maker:** Comment, File Name, GPS, Tag, Type, Maker (highlighted), Camera Model, Creator, Extension, Frame Size, Frame Rate, Duration, Still Sequence, Size
- Frame Size:** 4K = 4096,3840; HD = 1920,1440,1280,960; SD = 720,640
- Tag:** Best, Mountain, wife, Unknown

Below the panels, there are thumbnails of video frames with their respective IDs: 95701771, 90695161, 66189385, 544190419, 537243580, 509210725, and 487361590.

SMART CATALOG

CONTENT MANAGEMENT

This screenshot displays the 'Smart Catalog' view of the Mync application. It shows a grid of video thumbnails organized into folders. On the right side, there is a detailed metadata panel for a selected clip, including:

- Clip Name:** Image 20170801
- Maker:** Grass Valley
- Camera Model:** Mync DLS
- Creator:** Michael
- Tag:** (None, Maxstream)
- Comment:** beautiful scenery
- File Information:** D:\gyp_mync_1438200450.jpg, Aperture: F5.0, ISO: 100, Date and time of d.: 2017-02-08 15:57:27, etc.

STORY-BOARD

This screenshot shows the 'Storyboard' view, which is used for editing video clips. It features a vertical timeline on the left with multiple rows of video thumbnails, each with associated timecode. The main area shows a large preview window of a video clip showing people on a beach. At the bottom, there is a playback control bar with play, stop, and seek buttons.

This screenshot displays the 'Account' and 'Uploader' settings. It includes an 'Account' dropdown menu and three upload options:

- Vimeo Uploader
- YouTube Uploader
- FTP Ftp Uploader

UPLOADER

SPECIFICATIONS**OS**

Windows 7 64-bit (Service Pack 1 or later)
 Windows 8.1 64-bit
 Windows 10 64-bit

CPU

Any Intel Core 2 or Core iX CPU. Intel or AMD single core CPU with a 3 GHz processor speed or faster (multiple CPUs and/or multicore CPUs are recommended). SSSE3 (Supplemental SSE3) instruction set support required.

Memory

4 GB RAM minimum (8 GB or higher recommended)

Others

Touch display support
 High-resolution display support
